

**Name of the structure :** Erasmus Generation Napoli

**Country :** Italy

**Economic sector :** Association

**Size :** 25-30 volunteers

« Government, Charity, Public Institution, Other »

**Main Industry :** Organisation of events, Communication

**Description :** Erasmus Generation Napoli is a non-profit Association created in 2017, in Naples, by Neapolitan and International students, who have decided to help and support all the International Erasmus Students coming to our city.

### Internship offer

1. The internship opportunity is available **full-time**. However, the student is **needed on events**. For example, if an event is scheduled on a weeked, the student will participate in the event and help the association. If the student participates in an event on weekends, he or she works part-time this week, because he/she will be full-time on weekends.

2. The tasks proposed depends on the competences of the student, and on his/her desire to learn different things : **administrative tasks** in the office, **communication** on social media that could be both in the office and remotely (via social media), **organisation of events** with the staff in the office (participation in the **decision process**, helping with ideas of future partnerships and events, helping the staff organising it via phone calls and emails for instance).

3. We need the student to be **proactive** and **willing to participate actively** in the association with us, and in resolving some issues that might happen - for example, due to Covid-19, we needed to re-think our whole communication strategy, and organize digital events, the interns come with new ideas and ways to help the association grow.

4. Erasmus Generation is an international association, that means **all languages are welcomed**. The student does not need to speak Italian to work with us because **80-90% of the work is with the Erasmus students and in English**. Besides, each year, the association gives free Italian courses for the Erasmus, and the interns can also join them.

5. **The internship is based in Naples, Italy**. We need the student in the city with us, to talk directly with the Erasmus and help us in the office (and of course, during the events). However, remote work can be possible in some exceptions, like Covid-19.

6. **The internship is unpaid**. However, as we are supported by the European Union, the student can apply to the Erasmus+ grant.
