Matlab 2016b Installation:

You can **run multiple versions** of MATLAB on your computer. By default, MATLAB installer will create a new installation directory for the new release. Therefore, you **do not need to uninstall** your existing MATLAB installation before installing Release 2015a.

Follow the steps below to install MATLAB

1. Double click on the "My Computer" icon on your desktop. Type or "Copy & Paste" \\software\academic\Matlab\Matlab_2016b\Windows in the "Address" field for Windows operating system and press "Enter". In this directory, select the architecture which is compatible with your operating system 32bit or 64bit.

Double click on the "**setup.exe**" to start the installation.
